

Equine Flu Vaccines (NEW)

PRESTIGE® 2

Product description

PRESTIGE® 2 has been shown to be effective for the vaccination of healthy horses 6 months of age or older against equine influenza virus (EIV) and equine herpesvirus types 1 and 4 (EHV-1 and EHV-4).

Product bullets

- Featuring updated equine influenza strains, Florida '13 Clade 1 and Richmond '07 Clade 2 , along with Kentucky '02
- Provides important risk-based respiratory disease protection
- Duration of immunity has been shown at 6 months for EIV
- Shown to decrease virus shedding of EIV and EHV-1
- Meets United States Equestrian Federation (USEF)/Federation Equestre Internationale (FEI) 6-month vaccination requirements for EHV and EIV
- Exceptional safety profile with Havlogen® adjuvant and Antigen Purification System™

Key words: PRESTIGE® 2, equine herpesvirus, Rhinopneumonitis, rhino, Influenza vaccine, flu strains, updated flu

PRESTIGE® 4

Product description

PRESTIGE® 4 has been shown to be effective for the vaccination of healthy horses 6 months of age or older against Eastern and Western encephalomyelitis viruses (EEE/WEE), equine influenza virus (EIV) and tetanus.

Product bullets

- Featuring updated equine influenza strains, Florida '13 Clade 1 and Richmond '07 Clade 2, along with Kentucky '02
- Duration of immunity has been shown at 6 months for influenza
- Shown to decrease viral shedding of influenza
- Meets United States Equestrian Federation (USEF)/ Federation Equestre Internationale (FEI) 6-month vaccination requirements for EIV
- Exceptional safety profile with Havlogen® adjuvant and Antigen Purification System™

Key words

PRESTIGE® 4, Eastern and Western Encephalomyelitis (EEE/WEE), sleeping sickness, influenza, tetanus, flu strains, updated flu

PRESTIGE® 5

Product description

PRESTIGE® 5 has been shown to be effective for the vaccination of healthy horses 6 months of age or older against Eastern and Western encephalomyelitis viruses (EEE/WEE), equine influenza virus (EIV), equine herpesvirus types 1 and 4 (EHV-1 and EHV-4) and tetanus.

Product bullets

- Featuring updated equine influenza strains, Florida '13 Clade 1 and Richmond '07 Clade 2, along with Kentucky 02
- Provides important risk-based respiratory disease protection
- Duration of immunity has been shown at 6 months for influenza
- Shown to decrease virus shedding of influenza and EHV-1
- Meets United States Equestrian Federation (USEF)/ Federation Equestre Internationale (FEI) 6-month vaccination requirements for EHV and EIV
- Exceptional safety profile with Havlogen® adjuvant and Antigen Purification System™

Key words

PRESTIGE® 5, Eastern and Western Encephalomyelitis (EEE/WEE), sleeping sickness, equine herpesvirus types 1 and 4, EHV-1, EHV-4, rhino, influenza, flu strains, updated flu, tetanus

PRESTIGE 5® + WNV

Product description

PRESTIGE® 5 + WNV has been shown to be effective for the vaccination of healthy horses 6 months of age or older against Eastern and Western encephalomyelitis viruses (EEE/WEE), equine influenza virus (EIV), equine herpesvirus types 1 and 4 (EHV-1, and EHV-4), tetanus and West Nile Virus.

Product bullets

- Featuring updated equine influenza strains, Florida '13 Clade 1 and Richmond '07 Clade 2, along with Kentucky '02
- Convenient, multiple antigen combination with WNV reduces the need for several injections
- Provides important risk-based respiratory disease protection
- Duration of immunity has been shown at 6 months for influenza
- Shown to decrease virus shedding of influenza and EHV-1 and EHV-4
- Meets United States Equestrian Federation (USEF)/ Federation Equestre Internationale (FEI) 6-month vaccination requirements for EHV and EIV
- Exceptional safety profile with Havlogen® adjuvant and Antigen Purification System

Key words

PRESTIGE® 5, Eastern and Western Encephalomyelitis (EEE/WEE), sleeping sickness, WNV, equine herpesvirus types 1 and 4, EHV-1, EHV-4, rhino, influenza, flu strains, updated flu, tetanus

PRESTIGE 5® + VEE

Product description

PRESTIGE® 5 + VEE has been shown to be effective for the vaccination of healthy horses 6 months of age or older against Eastern, Western and Venezuelan encephalomyelitis viruses (EEE/WEE/VEE), equine influenza virus (EIV), equine herpesvirus types 1 and 4 (EHV-1, and EHV-4) and tetanus.

Product bullets

- Featuring updated equine influenza strains, Florida '13 Clade 1 and Richmond '07 Clade 2, along with Kentucky '02
- Provides important risk-based respiratory disease protection
- Duration of immunity has been shown at 6 months for influenza
- Shown to decrease virus shedding of influenza and EHV-1
- Meets United States Equestrian Federation (USEF)/ Federation Equestre Internationale (FEI) 6-month vaccination requirements for EHV and EIV
- Exceptional safety profile with Havlogen® adjuvant and Antigen Purification System™

Key words

PRESTIGE®, Eastern, Western, and Venezuelan encephalomyelitis (EEE/WEE/VEE), sleeping sickness, equine herpesvirus types 1 and 4, EHV-1, EHV-4, rhino, influenza, flu strains, updated flu, tetanus

PRESTIGE® PRODIGY®

Product description

PRESTIGE® PRODIGY® has been shown to be effective for the vaccination of healthy horses 6 months of age or older against abortion and respiratory disease caused by EHV-1.

Product bullets

- EHV-1, or rhino, can cause respiratory tract infections, epidemic abortions in mares, the birth of non-viable foals and sporadic neurological disease. This vaccine does not have a label claim for neurological disease protection.
- An inactivated, purified, concentrated, adjuvanted, tissue culture origin, equine herpesvirus EHV-1 vaccine
- Exceptional safety profile with Havlogen® adjuvant and Antigen Purification System™

Key words

PRESTIGE®, PRODIGY®, Prestige Prodigy, respiratory, respiratory disease, EHV-1, rhino, abortion

Equine Vaccines

PRESTIGE® WNV

Product description

Prestige® WNV has been shown to be effective for the vaccination of healthy horses 6 months of age or older against West Nile Virus. This product has been shown to be effective against encephalitis and viremia caused by West Nile Virus.

Product bullets

- Use prior to mosquito season; generally spring (depending on region of country)
- Exceptional safety profile with Havlogen® adjuvant and Antigen Purification System™

- West Nile virus is a core vaccine, recommended by AAEP for all horses, every year¹

¹AAEP Core Vaccine Guidelines (aaep.org)

Key words

West Nile Virus, WNV, encephalitis, viremia, west Nile, Equi-Nile, Equinile, Equi Nile

PRESTIGE® TETANUS

Product description

Prestige® Tetanus has been shown to be effective for the vaccination of healthy horses, cattle, swine and sheep 6 months of age or older against tetanus.

Product bullets

- Tetanus is a core vaccine, recommended by AAEP for all horses, every year¹
- Use annually (usually in spring)
- Use with pregnant mares 4-6 weeks prior to foaling¹
- Use with injured horses (wounds, surgery, etc.) if last dose wasn't administered within 6 months
- Do not vaccinate within 21 days before slaughter.

¹AAEP Core Vaccine Guidelines (aaep.org)

Key words

PRESTIGE®, Prestige Tetanus, Super-Tet, tetanus, supertet, super tet

PRESTIGE® 3

Product description

PRESTIGE® 3 has been shown to be effective for the vaccination of healthy horses 6 months of age or older, as an aid in the prevention of disease caused by Eastern and Western encephalomyelitis viruses and tetanus.

Product bullets

- Exceptional safety profile with Havlogen® adjuvant and Antigen Purification System™
- Use annually (usually in spring)
- EEE, WEE, and tetanus are core vaccines, recommended by AAEP for all horses, every year¹

¹ AAEP Core Vaccine Guidelines (aaep.org)

Key words

PRESTIGE® 3, Prestige, Tetanus, Encephalomyelitis, EEE, WEE, ENCEVAC® T, sleeping sickness, Encevac T

PRESTIGE® 3 + WNV

Product description

PRESTIGE® 3 + WNV has been shown to be effective for the vaccination of healthy horses 6 months of age or older against Eastern and Western encephalomyelitis viruses, tetanus and West Nile Virus. This product has been shown to be effective against encephalitis and viremia caused by West Nile Virus.

Product bullets

- Use annually (usually in spring)
- Vaccinate every 6 months (optional depending on risk)
- Exceptional safety profile with Havlogen® adjuvant and Antigen Purification System™
- EEE, WEE, WNV and tetanus are core vaccines, recommended by AAEP for all horses, every year¹

¹ AAEP Core Vaccine Guidelines (aaep.org)

Key words

PRESTIGE® 3 + WNV, Prestige, Tetanus, Encephalomyelitis, EEE, WEE, West Nile Virus, WNV, ENCEVAC® T + WNV, sleeping sickness, Encevac T

PRESTIGE® EHV 1&4

Product description

PRESTIGE® EHV 1&4 has been shown to be effective for the vaccination of healthy horses 6 months of age or older against EHV-1 and EHV-4. This product has been shown to be effective against virus shedding of EHV-1 and EHV-4.

Product bullets

- Rhino is among the most common and contagious respiratory diseases in horses
- Available in 10-dose vials
- Exceptional safety profile with Havlogen® adjuvant and Antigen Purification System™

Key words

PRESTIGE® EHV 1&4; Rhinopneumonitis, EHV-1, EHV-4, PRESTIGE®, rhino, equine herpesvirus, Prestige
